

Wireless Connection Setting [Ubuntu]

1. Assuming you are receiving Internet through a Wireless connection, Open your Network Manager via the Network Icon on the Unity Panel:

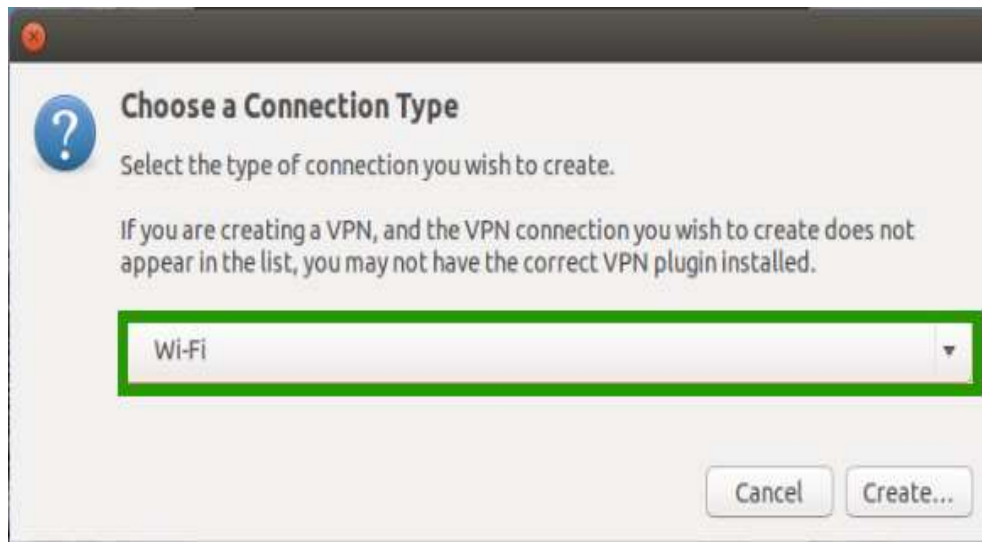

2. Go all the way down to the Edit Connections option and click on it.

3. Click add button

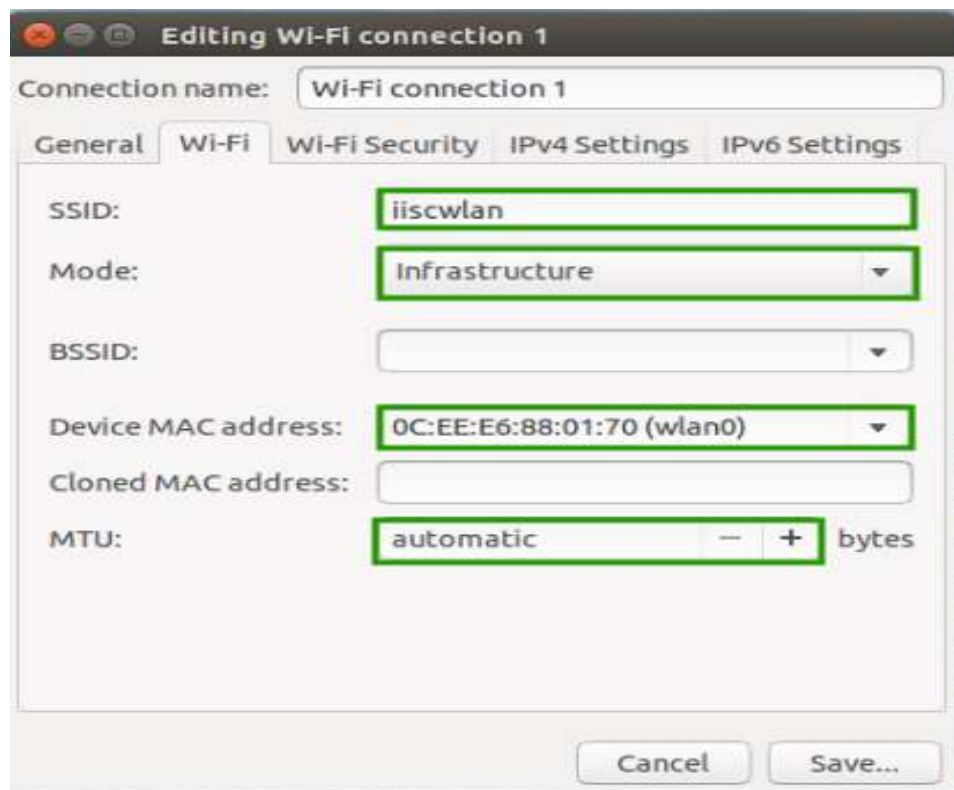

4 . Choose connection type as wifi :

5. Select General Tab and check the CheckBox

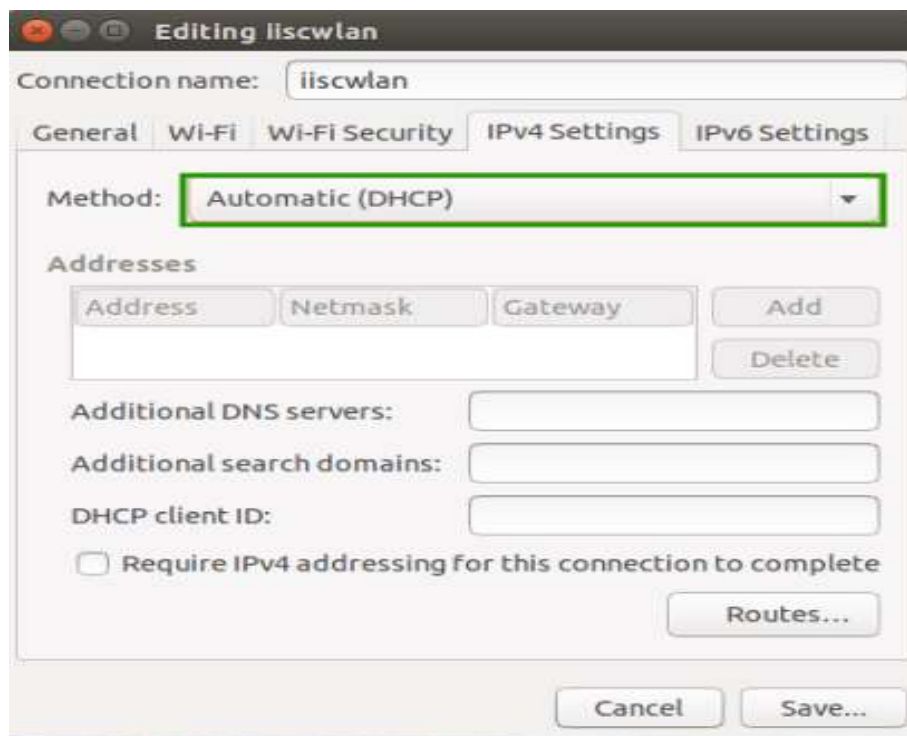

6. Select Wi-fi Tab and either it will automatic come or put manually

7. Select Wi-fi Security Tab and set it as shown below

9 . Select IPv4 and IPv6 Tab and set it to Automatic

9. Now open Network by searching in Search Tab and change proxy setting to proxy.serc.iisc.ernet.in and you can start accessing the Internet
