

## Windows -8.1 WIFI setting

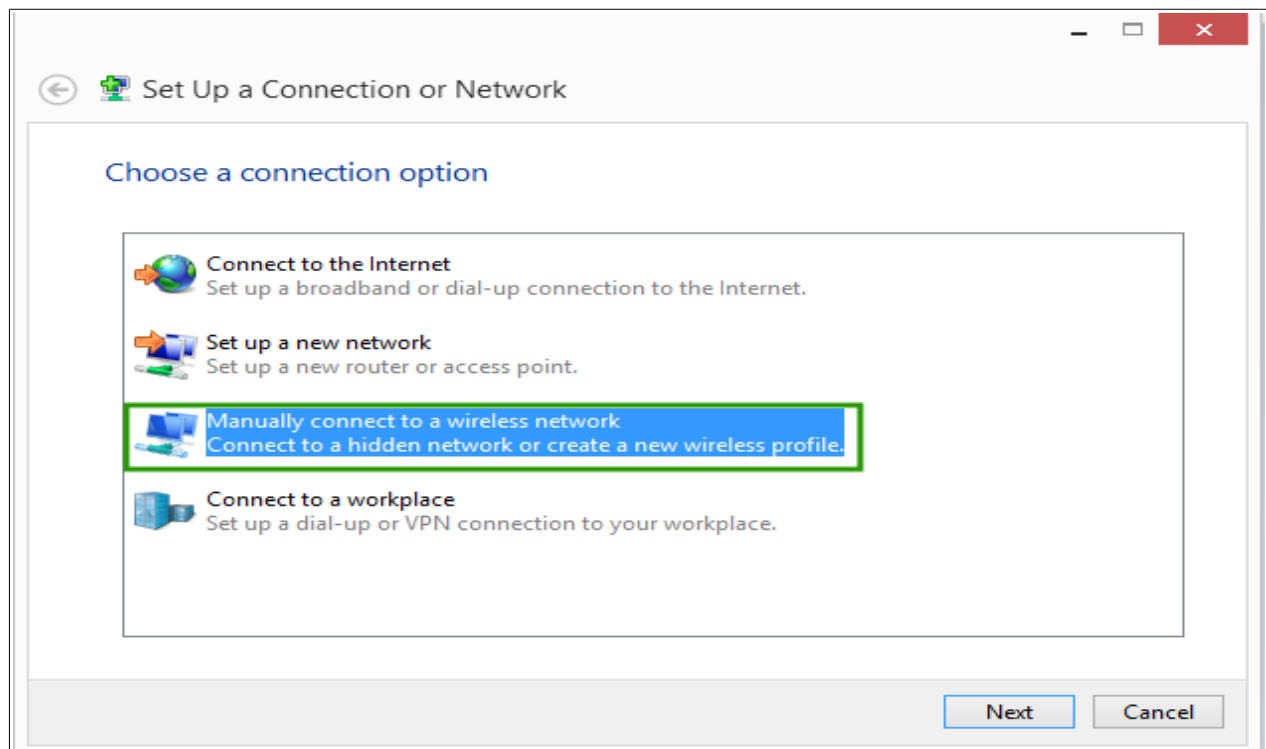

1. Put your WIFI ON . Right click on the network symbol of your desktop screen bottom right corner .Select **network and sharing Center**

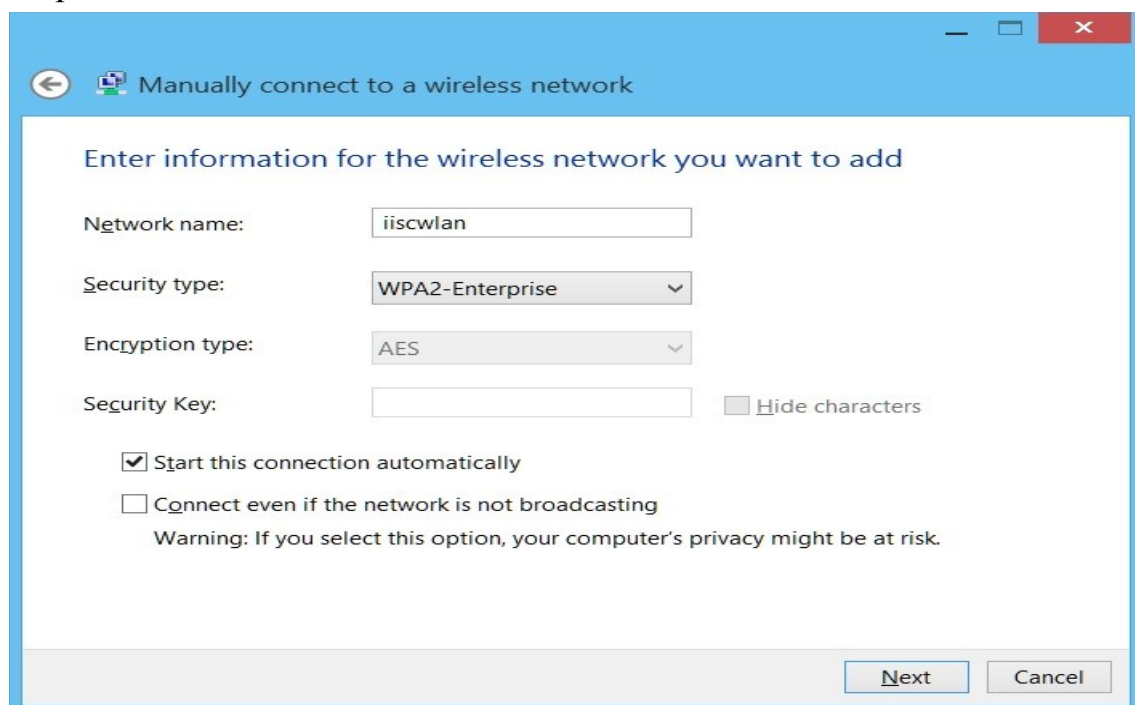

2. Click on **set up a new connection**

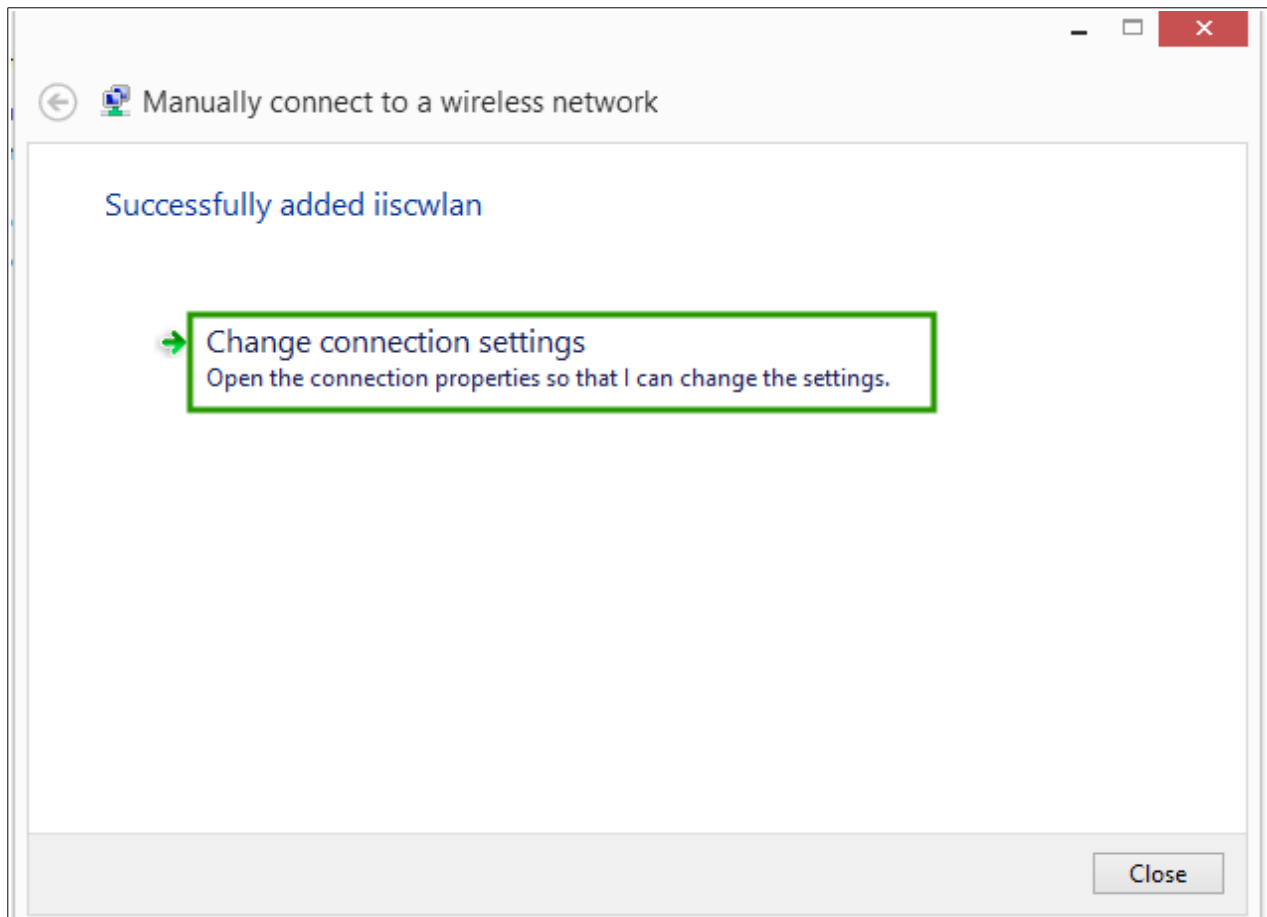

3. Select **Manually connect to a wireless Network** and press Next

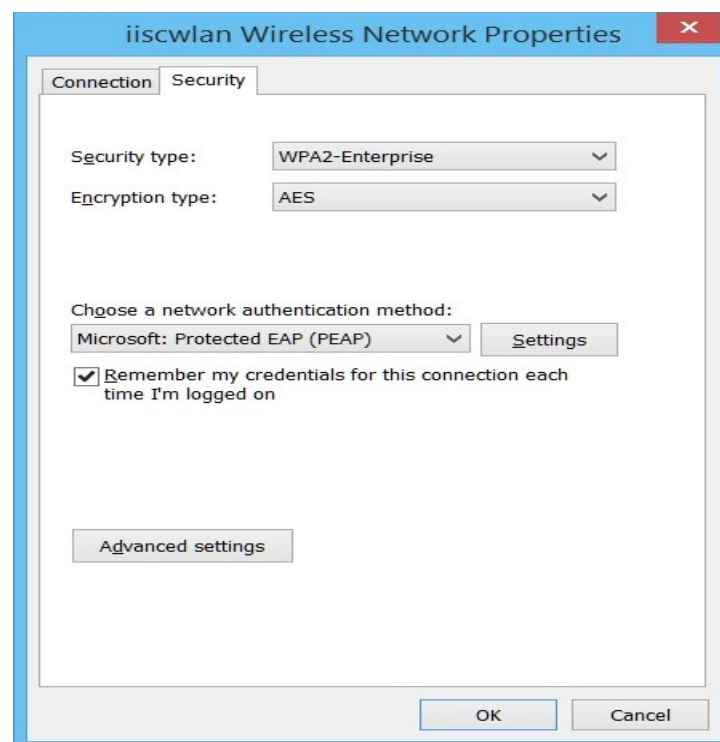

4. Write Network name **iiscwlan** security type **WPA2-Enter...** Encryption type **AES** and press next.

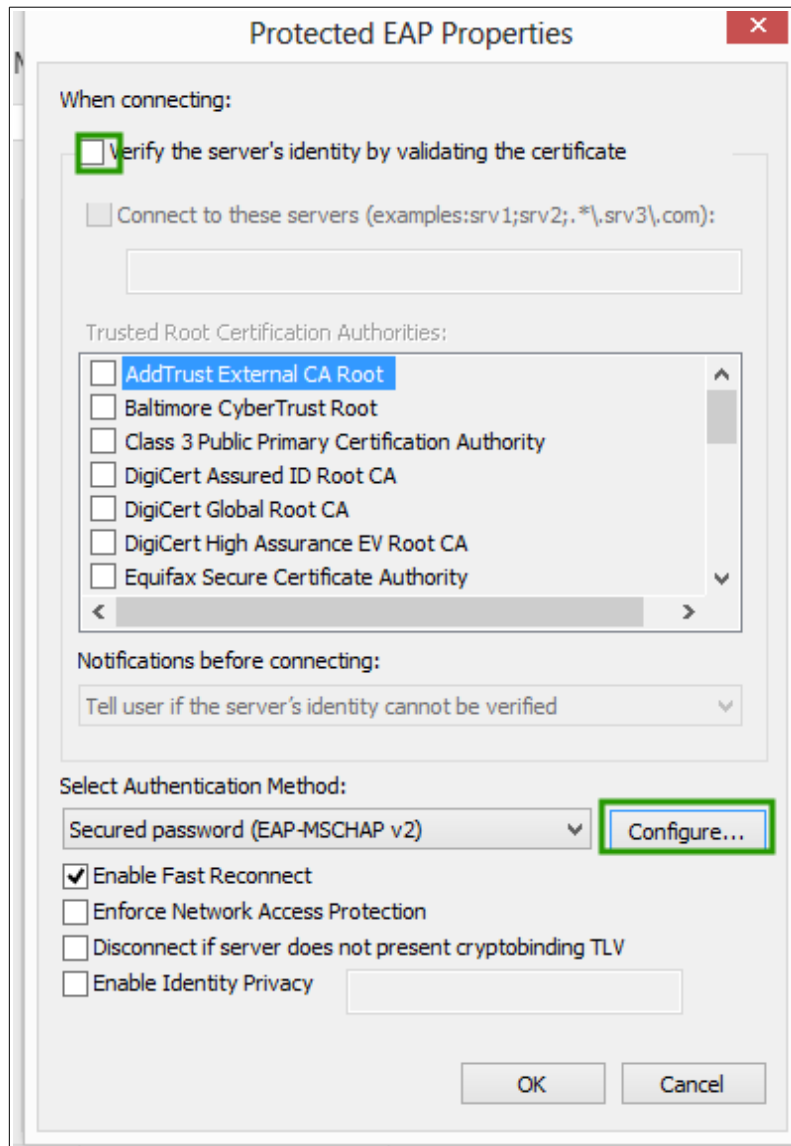

## 5. Select **change connection setting**

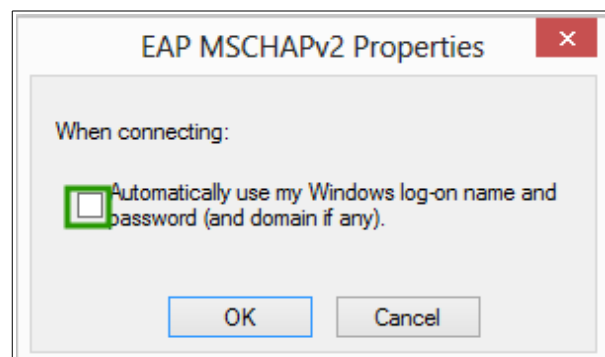

## 6. Select **Security** Tab. Select security **WPA2 – Enter...** Encryption-type **AES** press **Setting**

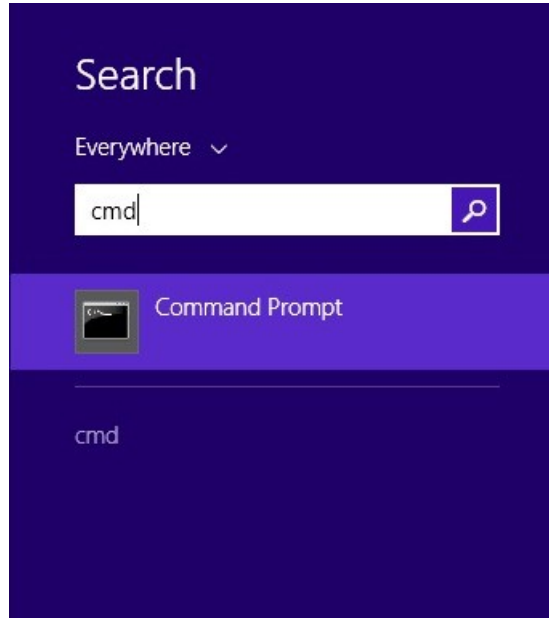

7. Uncheck **Verify server...** and click **configure..**

8 . Un-check **Automatically use my ..... and click OK for all opened windows..**

9. Search for **cmd** , right click and select “Open as Administrator”

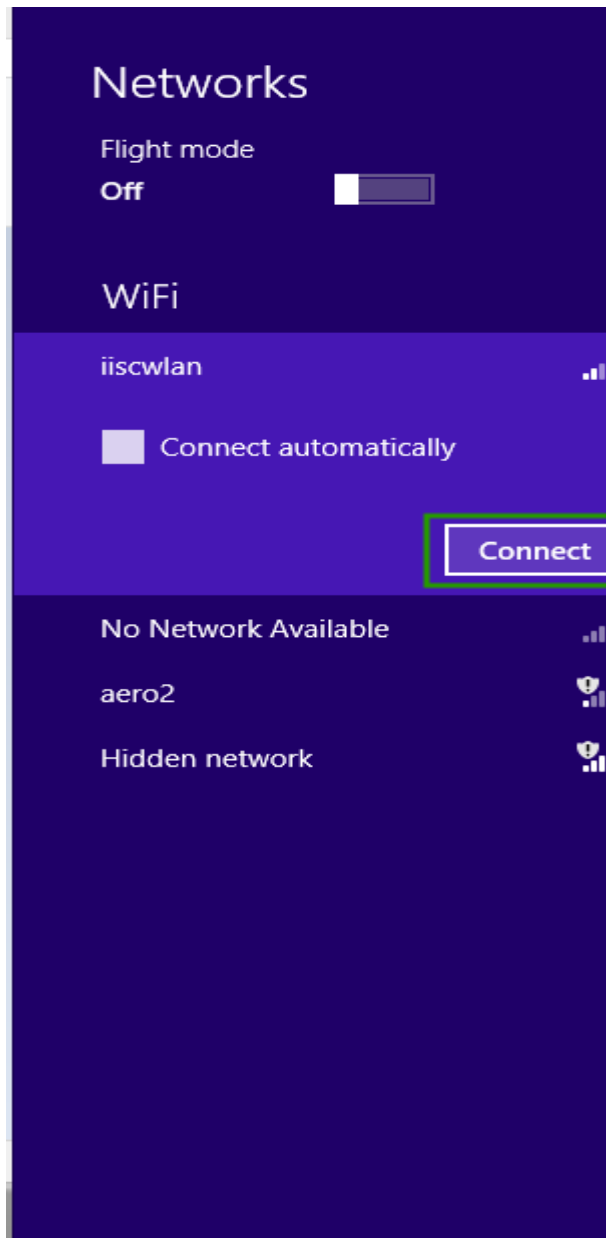

10. Type the following commands as shown below

```
>netsh  
>wlan  
>show profiles  
>set profileparameter name=iiscwlan authentication=wpa encryption=tkip  
authMode=userOnly  
>export profile name=iiscwlan
```

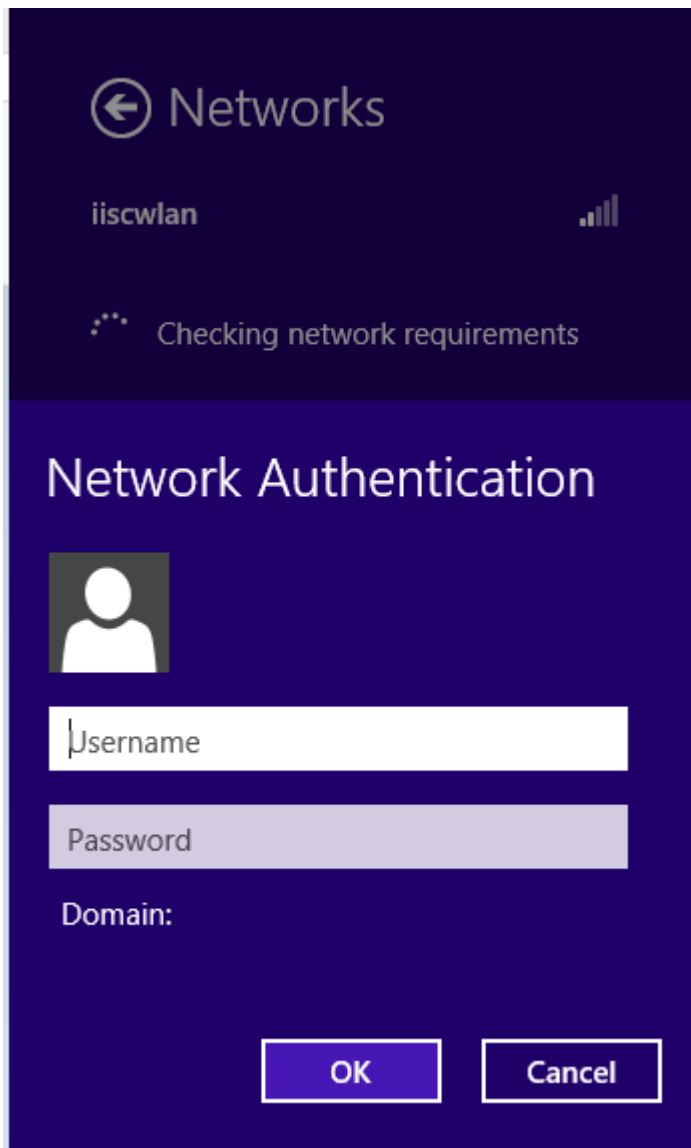

11. Click on the network symbol of your desktop screen bottom right corner  
Select **connection to a network** .

- 12 . click **iiscwlan**

13 . Click **Connect** . Enter your **Username & Password** and click **OK**

The image shows a Windows Network Authentication dialog box. At the top, it says 'Networks' with a back arrow icon. Below that, it shows 'iiscwlan' with a signal strength indicator. A status bar at the top right says 'Checking network requirements'. The main title is 'Network Authentication'. Below the title is a user icon placeholder. There are three input fields: 'Username' (white), 'Password' (light blue), and 'Domain:' (white). At the bottom are two buttons: 'OK' and 'Cancel'.

14. Now go to your Browser Setting->Proxy(chrome ) or Edit Preference  
->Advanced → Setting ( Mozilla ) and set your proxy as **proxy.serc.iisc.ernet.in**  
or more information check another link for proxy setting ...sometimes it show no  
Internet access but you are able to connection

15. For any assistance, contact CMC (No.G10 SERC or <mailto:cmc@serc.iisc.in>)
